Summary

Passionate and results-driven Full-Stack Developer with 8+ years of experience delivering high-traffic, scalable web applications and APIs.

Specializing in **Laravel** and **WordPress**, I build custom plugins, RESTful services, and admin dashboards while excelling on the front end with **React.js**, **Tailwind CSS**, and modern JavaScript frameworks. On the backend, I leverage **PHP**, **Node.js**, and **Python (FastAPI)** to optimize database performance (**MySQL**, **MongoDB**) and server-side logic, integrating platforms such as **Shopify**, **Slack**, **Zoho**, and **SendGrid** to power real-time workflows and notifications.

An early adopter of **Generative AI**, I incorporate tools like **ChatGPT** (brainstorming, API design), **Claude-code** (code scaffolding, refactoring), and **MCP (Model Context Protocol)** to orchestrate multi-model AI pipelines and connect AI models, tools, and data sources seamlessly.

I work closely with and guide **small developer teams (2–3 members)**—mentoring them, enforcing code quality (Larastan, PHP-CS-Fixer), and managing complex deployments via **Docker**, **Bitbucket Pipelines**, **GitHub Action**, and **Envoyer**. My goal is to combine deep technical expertise with AI-driven automation to deliver elegant, user-centric solutions that push the boundaries of possibility.

Experience

Senior Software Engineer

Nandan Global • Remote

07/2025 - Present

- Engineered and optimized Laravel Jobs, Queues, and Schedules to improve asynchronous task processing speed and system reliability.
- Developed custom Laravel and WordPress plugins to extend application functionality and streamline client workflows.
- Created and maintained Python scripts for AI model integration and web scraping, automating data collection and reducing manual processing time by 40%.
- Managed cloud infrastructure, CI/CD pipelines (Docker, Bitbucket Pipelines, GitHub Actions), and AI integrations to enable seamless deployments and improve development efficiency.

Senior WordPress & Laravel Developer

Atarim • Remote

04/2021 - 07/2025

- Led backend development in Laravel, architecting and deploying RESTful APIs that improved application performance and reduced error rates.
- Engineered new WordPress plugin features and integrated third-party APIs from the ground up, enhancing site functionality and user experience.
- Optimized MySQL database schema, Laravel Eloquent queries, and caching strategy, reducing page load times by 35% and improving scalability.
- Scraped external websites and embedded them via secure iframes to deliver dynamic, real-time content to client platforms.
- Developed and deployed new React.js navigation components, enhancing UI responsiveness and usability across multiple client applications.

Experienced WordPress Developer

Cyberize Group • Remote

06/2019 - 07/2025

- Managed and maintained 20+ WordPress websites, diagnosing and resolving theme and plugin conflicts to ensure 99.9% site uptime.
- Designed and launched custom WordPress sites using Thrive Theme and Elementor, delivering fully responsive and SEO-optimized platforms for clients.

- Configured and customized advanced plugins (Learndash, WP Rocket, WPForms, Yoast, ACF, GamiPress) to enhance site performance, e-learning functionality, and user engagement.
- Provided ongoing technical support and preventive maintenance for 20+ client websites, reducing incident resolution time by 50% through proactive monitoring.

Laravel Developer

SPARK Business Works • Remote

08/2018 - 07/2025

- Developed and deployed custom SaaS applications in Laravel, enabling multi-tenant architecture and supporting 1,000+ active users across multiple client industries.
- Refactored and optimized legacy Laravel codebases, eliminating critical bugs and improving system stability, reducing error logs by 60%.
- Designed and integrated new features into a Laravel-based travel management platform, streamlining booking workflows and reducing manual processing time by 30%.
- Implemented automated Excel export functionality, enabling real-time data reporting and reducing manual report generation from hours to minutes.
- Created and maintained Laravel cron jobs to automate recurring data synchronization tasks, ensuring consistent system updates with minimal downtime.
- Configured and optimized Laravel Jobs, Queues, and Events to improve asynchronous processing and enhance application responsiveness.

PHP Developer

ISLEBERG Technology Pvt. Ltd. • WB

06/2013 - 07/2025

- Developed and customized OpenCart-based e-commerce websites, implementing secure payment gateways and product catalog features to support 500+ SKUs per store.
- Designed and implemented custom WordPress themes, including advanced Divi-based layouts, delivering responsive, SEO-optimized websites tailored to client branding.
- Engineered custom WordPress plugins to automate business workflows, integrate third-party APIs, and enhance site functionality for diverse client needs.
- Developed Python-based web scraping tools to extract and process image assets from multiple sources, accelerating content population for e-commerce platforms.

Skills

PHP, Laravel, WordPress, Javascript, Python, React.js, Vue.js, HTML5, Node.js, Tailwind CSS, MySQL, MongoDB, JQuery, FastAPI, AWS, CI/CD, Docker, Generative AI

Education

BCA

Burdwan Institute of management and Computer Science • Burdwan

05/2011

Languages

Bengali, English, Hindi
